Experiment 6: Mobile Network Handoff Simulation

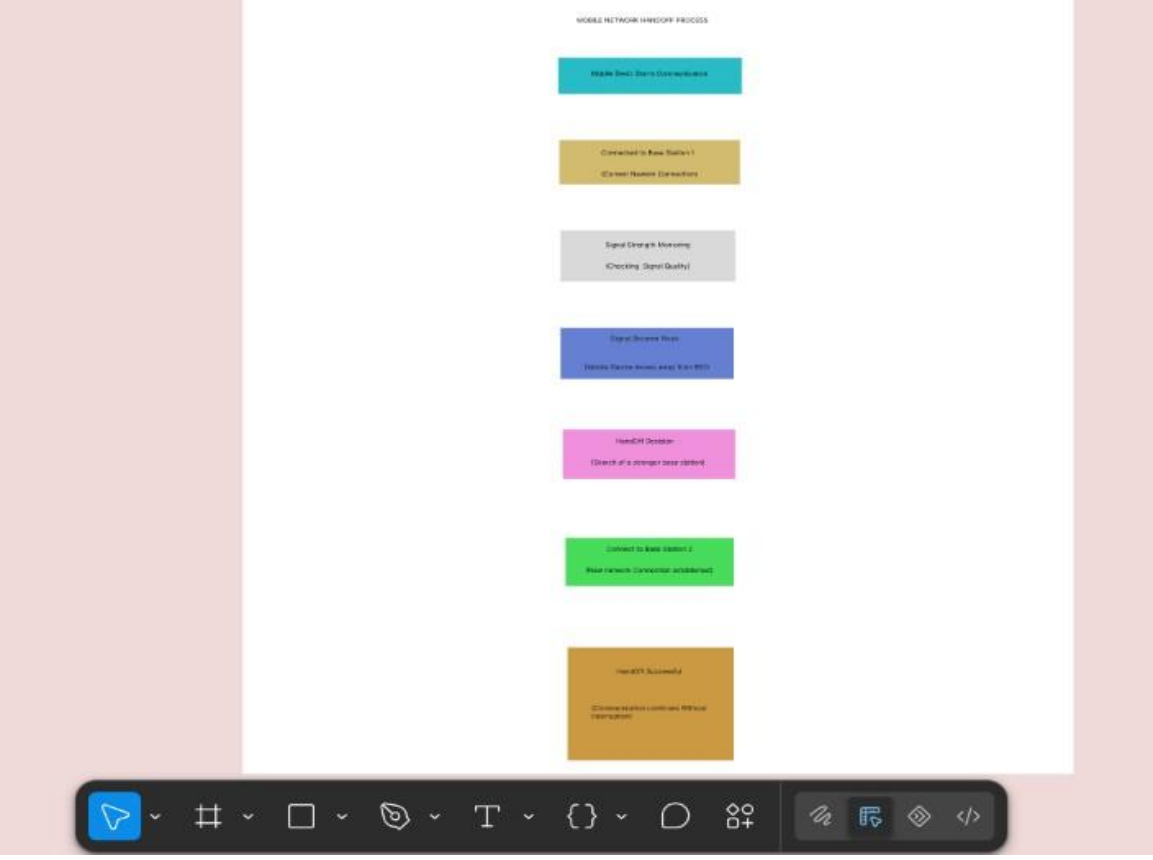

Aim:

To use Figma to simulate a handoff scenario in a mobile network and visualize the process.

Algorithm:

1. Open Figma and create a new design file.
2. Create a frame and add the title "Mobile Network Handoff Process".
3. Draw rectangles representing the handoff steps.
4. Add the steps: Mobile Device, Base Station 1, Signal Monitoring, Weak Signal Detection, Handoff Decision, Base Station 2 and Handoff Successful.
5. Connect all the steps using arrows.
6. Apply different colours to each stage.
7. Add mobile device and base station icons.
8. Save and export the design as a PNG image.

OUTPUT:

Result:

The mobile network handoff process was successfully simulated in Figma, illustrating how a mobile device transfers its connection from one base station to another without interrupting communication.
