EXP 2: Design a user interface prototype for a mobile station using Figma, considering connectivity and convenience.

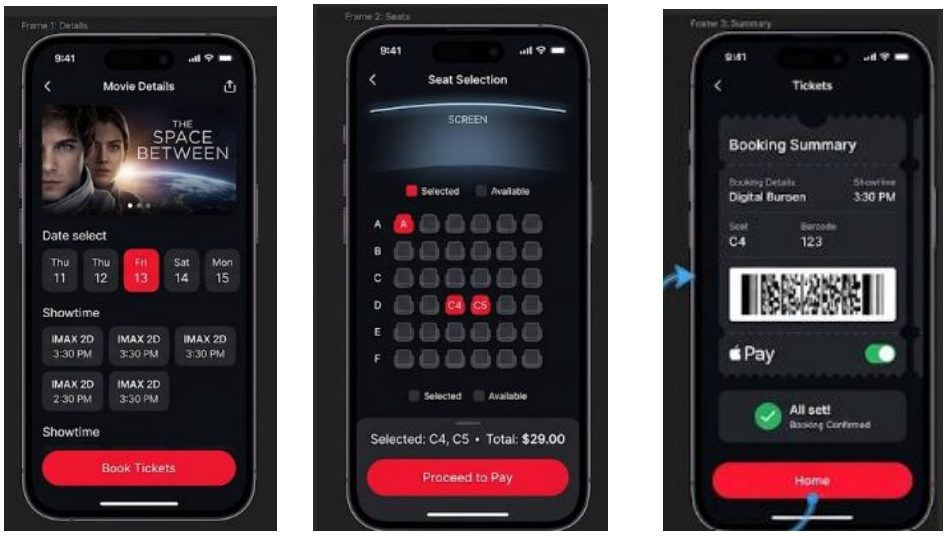

Aim

To design an interactive 3-screen movie ticket booking UI prototype in Figma for a mobile device, including movie details, seat selection, and digital ticket confirmation.

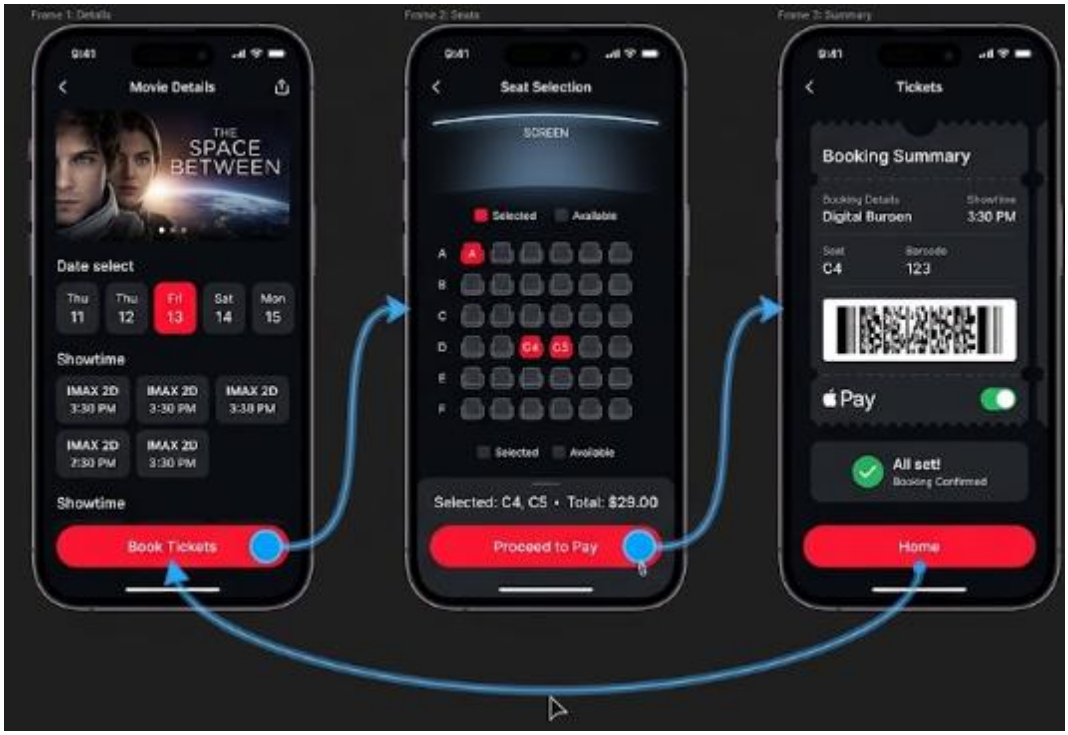

Procedure

1. **Create Frames:** Insert three iPhone 14 & 15 Pro frames side-by-side on the canvas.
2. **Setup Backgrounds:** Set the fill color of all three frames to dark charcoal
3. **Build Frame 1 Header:** Add a top status bar, location dropdown, and search icon.
4. **Add Movie Info:** Place the movie poster, title, rating badge, and runtime.
5. **Add Date & Times:** Insert horizontal date selection cards and showtime pills.
6. **Add Frame 1 CTA:** Create a rounded bottom button labeled "Book Tickets".
7. **Design Frame 2 Screen:** Draw a curved top screen glow and add the seat status legend.
8. **Build Seat Matrix:** Create a grid of seats with selected red markers and a "Proceed to Pay" button.
9. **Build Frame 3 Ticket:** Design a perforated digital pass with summary details, barcode, and confirmation badge.
10. **Wire Prototype:** Connect buttons sequentially using **On tap** ,**Smart Animate** in the Prototype panel.

Prototype:

Result:

Thus, the 3-screen mobile movie ticket booking UI prototype featuring Movie Details, Seat Selection, and Ticket Summary was successfully designed and prototyped using Figma on an iPhone 14/15 Pro canvas.
