EXPERIMENT 1: Use Figma to create an interactive diagram illustrating the components of a basic cellular system.

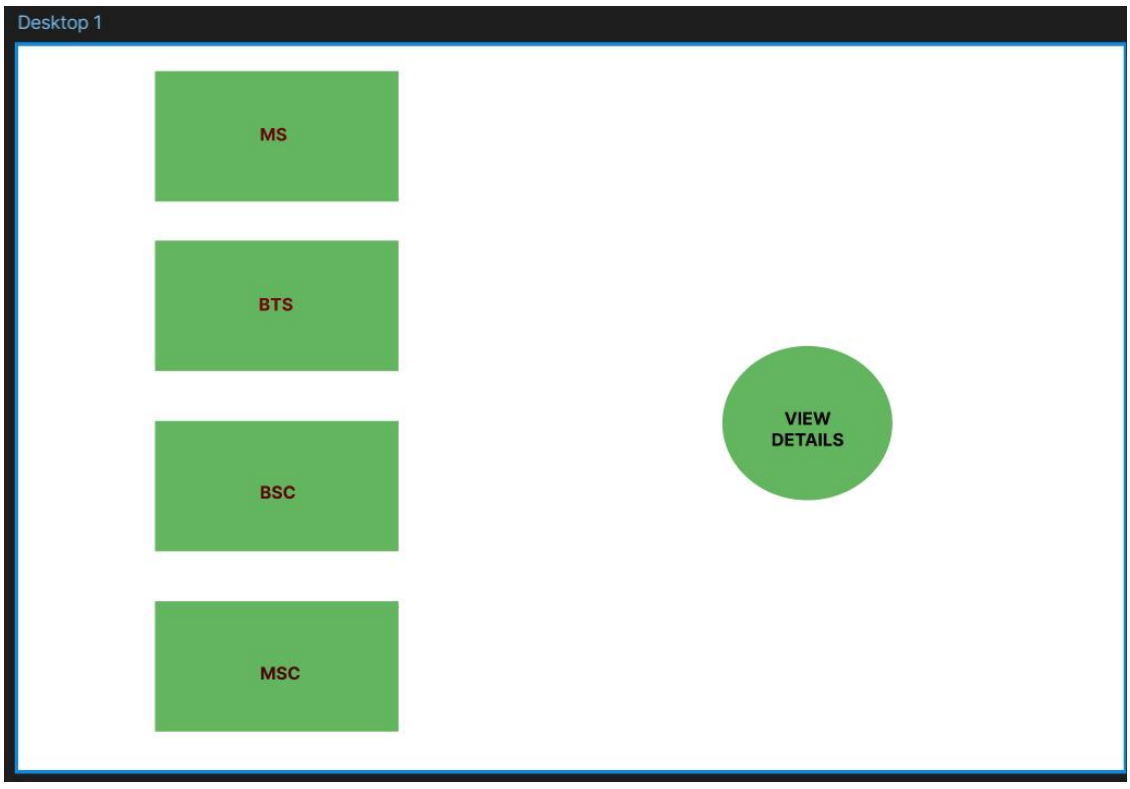

Aim

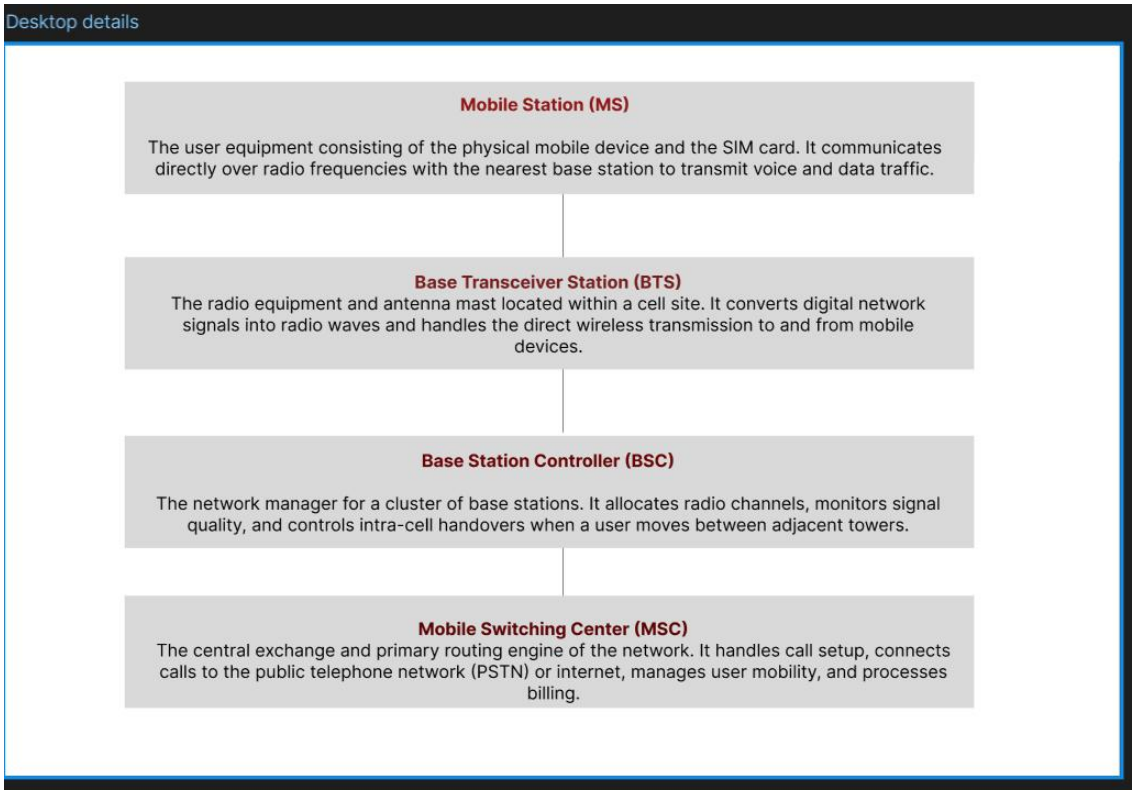

To create an interactive cellular network diagram in Figma navigating between overview blocks and full component details.

Procedure

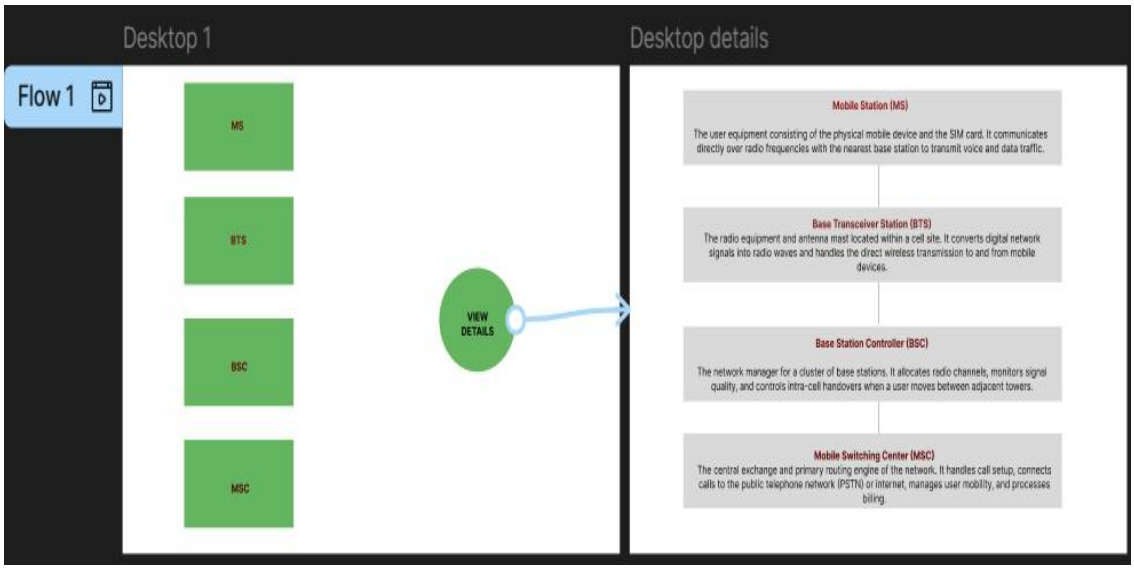

1. **Insert Frame:** Create a desktop frame named Desktop 1.
2. **Draw Blocks:** Draw four vertical rectangular cards on the left.
3. **Add Acronyms:** Label them MS, BTS, BSC, and MSC.
4. **Create Button:** Draw a circular VIEW DETAILS button on the right.
5. **Duplicate Frame:** Duplicate it and name the new frame Desktop details.
6. **Expand Cards:** Resize cards into wider horizontal boxes.
7. **Add Content:** Insert full component names and functional descriptions.
8. **Draw Links:** Add vertical connecting lines between the cards.
9. **Link Frames:** Connect the VIEW DETAILS button to Desktop details in Prototype mode.
10. **Test Flow:** Set to **On click** right arrow **Smart Animate** and click Present.

Prototype:

Result

The interactive diagram representing the basic cellular system architecture was successfully designed and prototyped using Figma, enabling smooth interactive navigation from high-level acronym blocks to detailed component specifications.
